Introduction

Welcome to the iniSimulations BelugaST Route Network Documentation. This document will cover the current, charter, historic and special flights, the A300-600ST operated. From transporting priceless works of art to Tokyo from Paris, to flying A320 stabilizers across the Atlantic, the Beluga can do it all.

All data on the Current Route Network has been collected from up to two years ago. Regarding charter, historic and special flights there was limited data, most of these flights occurred between 1998 - 2006. However there are over 90 flights listed on this document, included are the IATA and ICAO codes for both the departure and arrival airfields.

Callsigns are shown on all current flights, only some are available on the charter, and historic flights due to the limited data. Letters at the end of the callsign, correspond with the last letter of the aircraft registration that flew the route. For example **BGA113C** from Toulouse to Hamburg Finkenwerder was flown by **F-GSTC**.

We hope you find this document valueable, for your future flights with the iniSimulations A300 BelugaST ON THE LINE. Enjoy exploring the world in the flying whale!

Kind regards,
The iniBuilds Team
